CUSTOMER SUCCESS STORIES: SEE WHY CUSTOMERS CHOOSE AANVAL

A LARGE GOVERNMENT AGENCY

Customer Success Stories: See Why Customers Choose Aanval

Customer Snapshot: A Large Government Agency

Industry: Government Administration. All security initiatives are managed in-house.

Customer Need: IT department in charge of investigating security incidents within the government agency and conducting forensic analysis was currently using a Unix based network intrusion detection system that supports Snort. However, the Information Security Manager wanted a more powerful IDS that could help monitor and manage their network for anomalies.

Customer Evaluation of Aanval SAS: During the selection process, the government agency evaluated a number of open-source and commercial IDS vendors including Aanval SAS (Situational Awareness System).

The IT department was impressed with Aanval's overall performance. The agency made the decision to switch IDS solution and purchased the Aanval SAS Enterprise License which includes annual unlimited sensor capacity and maintenance. The agency is now using Aanval as their stand alone IDS along with an Aanval Appliance. Aanval is fully deployed and the department is now taking advantage of Aanval's IDS features. Price was also a big factor in the purchase decision due to the agency's limited budget. With Aanval, the government agency is now able to deploy and monitor more Snort sensors and gain needed situational awareness and network visibility without breaking the bank.

Aanval Has Helped with the Following:

- Improve Operational Efficiency. Helped streamline the IT process of monitoring activities, analyzing and correlating event data, delivering security alerts, and investigating security incidents
- Delivered valuable situational awareness and network visibility

Customer Success Stories: See Why Customers Choose Aanval

- Streamline IT process of investigating anomalies in the network

The Top 3 Business Benefits of Aanval:

- Event Management/Collection
- Affordable Pricing
- Network Visibility and Situational Awareness
